FALL WINTER SERVICE

Be Prepared

Your Isuzu-built vehicle is one tough truck. But even the toughest truck needs some attention. In many parts of the country, winter brings cold, snow, and ice! These conditions can tax every part of your truck. Now is a good time to prepare your Isuzu-built truck for winter by inspecting and maintaining the items that can be affected by cold weather: cooling system, battery, tires, windshield washer solution, wipers and tires.

ANTIFREEZE

Antifreeze and water are normally mixed at a 50/50 ratio, half water, half antifreeze, a mix that usually brings your protection level to twenty degrees below zero. If the temperatures in your area dip below zero, a small amount of antifreeze mix should be drained from the radiator and replaced with straight antifreeze. In the spring, it should be returned to the standard mixture. Too much antifreeze can cause cooling problems in hot weather.

WINDSHIELD WASHER MAINTENANCE AND WIPER BLADES

Use a washer solution that won't freeze in winter temperatures. The solution should be checked regularly, since you'll use your windshield washers more often when traveling on slushy streets. Replace wiper blades that are more than six months old. If there's frost, frozen rain, or snow on your windshield, make sure wipers are free before turning them on. Otherwise you may end up with torn blades, a blown wiper fuse, or a damaged wiper motor.

TRUCK CENTER

ENGINE OIL CHANGES

Engine oil needs to be the correct viscosity for your winter temperatures. We stock the correct oil and filters required for maximum performance any time of year.

As an authorized Isuzu dealer, we can provide the factory approved parts, tools and expertise to keep your Isuzu built vehicle in top condition.

Let us help you lower your operating costs, extend the life of your truck, and keep it on the road making money for you.

Isuzu Commercial Trucks of America Awards Monarch Truck Center the 2026 Ichiban Dealership Award

Isuzu Commercial Trucks of America

ICHIBAN DEALER

A graphic for the Isuzu Ichiban Dealer award. It features a red square with the Isuzu logo at the top, a large red Japanese character "一番" (Ichiban) in the center, and "2026" and "ICHIBAN DEALER" at the bottom. Below the graphic is a photograph of two white Isuzu commercial trucks parked in front of a building. The Monarch Truck Center logo is in the bottom left corner of the graphic.

Congratulations to Monarch Truck Center on earning the 2026 Isuzu Ichiban Award—the highest honor from Isuzu Commercial Truck of America!

“Ichiban” means Number One, and this award recognizes the top-performing Isuzu dealers in the country for excellence in:

- Customer satisfaction
- Sales performance
- Service and parts support
- Overall dealership operations

This achievement reflects Monarch Truck Center’s commitment to delivering best-in-class service and support to every customer, every day.

WINTER TIRE SAFETY

Tires should have good tread. Cold temperatures lower tire pressure. We can adjust pressure as needed, based on the manufacturer's recommendation. Switch to all-season or snow tires if you regularly travel through snow. Not all tires are the same. We have joined with Yokohama Tire Company to offer a wide selection of highway tread, all-season tread and snow tire replacements. You will have access to the advanced technology that Yokohama offers, providing longer, even wear, less maintenance, and advanced tread designs that will reduce your operating costs.

BATTERY

During extreme cold, your batteries can be taxed to their limit and they can require more "cranking" power. Your battery cables and terminals need to be clean and tight. We can test your battery and provide the manufacturer's recommended replacement if necessary.

Important Hino Information

Emissions Warranty Recall AB5S0 and AB5R0

Important Hino Emissions Recall – Schedule Your Appointment Today

You've probably received a notice in the mail or by email from Hino about the Emissions Recall (AB5S0 and AB5R0) affecting 2018–2021 year model trucks.

We want to make sure you're covered and that your truck receives this important update. This recall includes both a software and hardware fix, which may take up to two days to complete.

While your truck is in Monarch's Service Shop, keep your business moving with a rental from Monarch Truck Rentals. Enjoy 35% off the daily rental rate on any rental truck during your service visit.

If you are uncertain whether your truck needs this recall, please give us a call — we can run your VIN to verify if your vehicle is included.

You can schedule your recall appointment at either of our Authorized Hino Service Centers:
